FINISHING PROGRAM FOR RECENT DRIVING SCHOOL GRADUATES

Upon your hire at Service One Transportation, all recent driving school graduates are placed in our comprehensive Finishing Program. The Finishing Program builds on what you have learned at driving school and incorporates real world truck driving experiences. This 4-6 week program goes through every facet of what driving for Service One entails. The program covers everything from preparing paper work, maintenance, inspections, and of course practical driving while under the supervisor of Service One's driver trainer. As you gain experience and confidence on the road, the Finishing program will move from shorter local work to progressively longer and more challenging runs that provide you the experience required to drive solo.
